

|  |                                     |  |                  |                        |  |  |
|--|-------------------------------------|--|------------------|------------------------|--|--|
| Thank you for your inquiry of Louisiana's forest industries. The following is a listing of known primary forest industries as identified by the Louisiana Department of Agriculture and Forestry. The list does not include every company but reflects the majority of industries located within the state. The mention of a company does not constitute endorsement by the department, nor does the omission of a company imply a lack of endorsement. Abbreviations have been used for space efficiency. Refer to the key below for descriptions. An employment class has been assigned to reflect approximate size. Please communicate any corrections or omissions to Michael Buchart. If you would like more information about Louisiana's forest resource and industries, please contact the department. |                                     |  |                  |                        |  |  |
